ELECTRICAL CHARACTERISTICS

INSTALLATION AND HANDLING

1. Do not touch the LED, contact will deposit oils that effect the normal operation/life.
2. Power: Reversing polarity may damage the device, confirm the positive and negative,
3. Strictly operate in accordance with electrical parameters, higher voltage will cause damage/degradation.
4. Avoid touching the LED with bare hands. Use anti static gloves or finger cots when handling LEDs.
5. Working surface should be clean, and well grounded. Include proper anti static protection.
6. Optical Hazard Risk: Avoid exposure to skin and eyes.
7. Heat Sink Required: Use a 1.6mm thick 20 mm² copper based heat sink or better.
8. Power supply is not included.

Storage: LEDs should be kept at 10 to 50 °C and 30 to 65% RH (Relative Humidity). Hermetic sealing is recommended, reseal after opening to prevent oxidation.
